The drop in the distribution of motor fuels and lubricants since 1 September 1952,  
despite continued normal production, may be caused by the following:

- a. Export quotas established too high
- b. Volkspolizei requirements in excess of estimates
- c. Stockpiling.

Comment: [REDACTED] If this 25X1  
information is true, and if the explanation suggested above (c.) is correct,  
stock piling is taking place on a scale not equalled since 1945.
